

LIST OF  
*Nursing Subject Headings*

Headings and Cross References Used

in the

CUMULATIVE INDEX TO NURSING LITERATURE

1975

## PREFACE

The first four editions of NURSING SUBJECT HEADINGS were published separately. This subject authority list has been included as part of the annual cumulation since 1971. It is a guide to the use of nursing subject headings as used in the CUMULATIVE INDEX TO NURSING LITERATURE. A listing of the new headings which have been introduced with this 1974 revision and the headings under which material on these subjects was formerly indexed is included.

This list follows the form adopted by the Library of Congress and uses the same symbols, e.g.,

- sa indicates a see also reference
- x indicates a refer from a see reference
- xx indicates a refer from a see also reference

See references (x) refer from terms not used to those used. These references appear in alphabetical order, but are in lower case, e.g.,

Adenoids See: TONSILS AND ADENOIDS

In other words, every heading in the list that is used or is a "good" term is in full capitals. Conversely, if a term is not in full capitals, then it is not a heading used for a subject entry.

See also references (sa) usually refer from a more general term to a more specific term, e.g.,

ANEURYSM  
sa AORTIC ANEURYSM

A refer from see also reference (xx) indicates that a see also reference (sa) has been made from the more general to the more specific term, e.g.,

AORTIC ANEURYSM  
xx ANEURYSM

Where terms are of more or less equal value both see also (sa) and refer from see also (xx) references may appear, e.g.,

FATIGUE  
sa REST  
xx REST  
REST  
sa FATIGUE  
xx FATIGUE

Cf following a term precedes all other cross references and suggests the consideration of another term not closely related, e.g.,

GROUP WORK  
cf TEAMWORK

Subdivisions of a subject are indented and preceded by a dash (--), e.g.,

NURSING EDUCATION  
--ADMINISTRATION  
--ASSOCIATE DEGREE PROGRAMS

Where pertinent certain subject headings are divided geographically, i.e.,

NATIONAL HEALTH PROGRAMS  
--AUSTRALIA  
--GREAT BRITAIN, etc.

The following subdivisions may be used.

ANALYSIS  
with any substance or its constituents for identification  
or quantitative determination  
ANATOMY  
with any subject which is a part of the body  
BIBLIOGRAPHY  
with any subject when pertinent  
DIAGNOSIS  
with any subject which is the name of a disease, condition  
or injury  
DISEASES  
with any subject when pertinent  
DRUG THERAPY  
with any subject which is the name of a disease, condition  
or injury for therapeutic action or prevention  
EDUCATION  
with any subject when pertinent  
EDUCATION, CONTINUING  
with any subject when pertinent  
EVALUATION  
with any subject when pertinent  
HISTORY  
with any subject when pertinent  
IN INFANCY AND CHILDHOOD  
with any subject when pertinent  
INJURIES  
with any subject which is a part of the body to identify  
traumatic wounds and injuries  
NEOPLASMS  
with any subject which is a part of the body  
PHYSIOLOGY  
with any subject which is a part of the body  
PROCEDURES AND TECHNIQUES  
with any specific clinical subject  
STANDARDS  
with any subject when pertinent  
STATISTICS  
with any subject when pertinent  
SURGERY  
with any subject when pertinent

Inverted headings are not indented but the inversion is indicated with a comma. Inverted headings file after the subdivisions, e.g.,

COLD--PHYSIOLOGICAL EFFECT  
Cold, Common See: COMMON COLD

Classes of Headings omitted from the List for which the Indexer supplies specific names as needed:

Names of persons

Names of places (Geographical headings)

Names of National and International Organizations

Scope notes indicate the range of subject matter to which a heading is applied in CINL. For an example of this, see under the heading NURSING.

The editors gratefully acknowledge the assistance received from the use of other existing subject heading lists, namely:
